EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In claim 1, line 4, "have" has been deleted. It is noted that "having have and angle" is not proper English.

In claim 5, line 7, "and" has been changed to -- an --. It is noted that this appears to have been a typographical error.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The claims in the instant application have not been rejected using prior art because no references, or reasonable combination thereof, could be found which disclose, or suggest, a reciprocating surgical tool capable or having the ability of being used in an oral cavity operation comprising in combination a handle; a neck extending from the handle at a first end; a head case coupled to a second end of the neck; a motor mounted inside the handle; a slider shaft mounted inside of the head case and having an angle of approximately 90° with respect to a longitudinal axis of the neck; a slider movable in a linear reciprocating direction along the slider shaft; a tool member mounted to the slider capable or having the ability of performing an oral cavity operation; and a power linkage device coupled between the slider and the motor capable or

having the ability of converting rotation power of the motor into linear reciprocating movement of the slider, wherein a direction of the operation performed by the tool forms an angle of approximately 90° with respect to the longitudinal axis of the neck as set forth in claim 1.

Also, no reference, or reasonable combination thereof, could be found which disclose, or suggest, a reciprocating saw capable or having the ability of being used in an oral cavity bone cutting operation comprising in combination a handle; a motor; a linkage capable or having the ability of converting rotating power of the motor into linear reciprocating movement; a slider shaft mounted at an end of the linkage and having an angle of approximately 90° with respect to the linkage; and a slider capable or having the ability of attaching one of a saw or file, wherein the slider moves reciprocatingly along the slider shaft so that the bone cutting operation performed by the saw or file attached to the slider forms an angle of approximately 90° with respect to a longitudinal axis of the handle as set forth in claim 5.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Eduardo C. Robert whose telephone number is 703-305-7333. The examiner can normally be reached on Monday-Friday, 9:30am-6:00pm.
